Divyangi Tiwari

UX Researcher & Designer

Bangalore, India | +91 6362151431 | divyangit28@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Research-led UX designer with a sharp eye for user behaviour, data and experimentation. Known for turning messy, real-world workflows into simple, intuitive experiences that drive measurable business impact, blending user research, product analytics and AI to shape bold design directions. Proven collaborator across product, engineering and operations teams, taking ideas from discovery and prototyping through to launches that stick. Thrive on translating complex insights into clear flows, interfaces and design decisions that elevate both experience and performance. Energized by problems that demand curiosity, empathy and decisive execution.

CORE SKILLS

- **Research:** user interviews, usability testing, mixed-methods research, heuristic evaluation, personas, competitive analysis
- **Design:** interaction design, information architecture, user flows, wireframing, prototyping, conversational design, AI-driven workflows
- **Service design:** journey mapping, service blueprinting, ecosystem mapping
- **Data:** A/B testing, product analytics, funnel analysis, SQL
- **Ways of working:** cross-functional teams, Agile/Scrum, PRDs, problem framing

PROFESSIONAL EXPERIENCE

UX Designer (Freelance) | F16s, B2B Logistics | Jul 2026 – Present

- **AI document extraction:** Built software that uses AI to pull the key details out of freight documents, cutting processing time from 30 minutes to 6 per document.
- **Shipment tracking:** Reduced phone calls for tracking and follow-ups from 10 to 2 per client.
- **Overall experience:** The overall design and experience led to 34% higher retention, with 4 new clients signing on within 3 weeks of launch.

Associate Product Manager, UX & Product | Connect and Heal, Healthtech, Bangalore | 2024 – Apr 2026

- **AI support bot:** Designed the conversations for an AI support bot that now answers the questions customers kept asking. L1 tickets dropped 35% and first-contact resolution rose 20%.
- **Invoice restructuring:** Redesigned the invoice format to align with both user and insurer requirements while ensuring GST compliance. Enabled faster insurer payments by systematically capturing all required information on the invoices.
- **Self-booked appointments:** Enabled users to add an external appointment in our system, reducing ops efforts by 24%. Successfully captured a new market of users who will be paying through CNH while having booked an appointment outside.
- **Pharmacy:** Optimized the user-centric pharmacy flow in collaboration with Tata 1mg by expanding the medicine catalog and introducing condition-specific categories, resulting in a 30% reduction in drop-off rates. Increased Average order value of medicine by 41% and reduced cancellations by 10%. Managed sprint cycles and led feature prioritization, ensuring alignment with business goals and maximizing delivering customer value.
- **Gmail integration:** Enabled seamless transfer and backup of health records via Gmail with auto-organisation under each user's profile decreasing TAT of searching health records by 32%. Conducted user interviews to analyze data and feedback that contributed to faster activation rates and also improved user retention rates. Identified opportunities to provide discoverability to other features through design engagement tools, improving the footfall in those features. Collaborate with engineering, design, and marketing teams, boosting cross-team collaboration by 30% and accelerating delivery timelines.

UX Researcher | Connect and Heal, Healthtech, Bangalore | 2022 – 2024

- **Prescribed orders:** Achieved a 65% reduction in order creation TAT by streamlining the process through extensive user research, ensuring a seamless and hassle-free experience. Increased order completion from 58% to 77%, adding 5,538 orders a month, and customer acquisition rate by 15%. Reduced TAT of adjudication and digitization from 20 to 7 minutes.
- **Health records:** Implemented a unified system for easy access, organisation, retrieval, and sharing of health records from all sources. Reduced TAT of health record upload by 70%, increased activation rate by 15%. Focused on growth marketing strategies to increase visibility and footfall.
- **Electronic Health Record (EHR):** Developed software for doctors to manage end-to-end clinic requirements in 2 months. Implemented agile methodologies, reducing time-to-market by 20%. Prioritized product backlog based on data insights and stakeholder feedback, ensuring alignment with business objectives and delivering key features on time.
- **Diagnostics:** A/B-tested small, quick fixes to the diagnostics order flow, which lifted completed orders by 20%.

Internships & Early Experience | F Gear, KH Exports, Inkshed Solutions, Decathlon India | 2019 – 2022

- **F Gear, User Research Intern:** my ergonomics research reshaped how products were positioned and priced, and average price went up 20%.
- **Inkshed Solutions, Content & SEO Intern:** planned content and SEO that lifted user retention by 15%.
- **KH Exports and Decathlon India:** market research at KH Exports; CRM and customer management at Decathlon.
